

Trading Cryptocurrencies: A Beginner's Guide

Bitcoin, Ethereum, Litecoin

Clem Chambers

SAMPLE

INTRODUCTION

This is a short book because time is no one's friend in the market. As I write, Bitcoin and a wave of other cryptocurrencies (called altcoins) are going wild. This is the dotcom bubble all over again, and if you can trade it and not blow up your account you can make a killing.

But cryptocurrencies are not shares, nor bonds, options or commodities. Bitcoins and all the other cryptocurrencies are their own ecosystem and obey new rules that no one fully understands.

This is where risk = reward. There is big risk and the chance of big reward.

But where do you start and then what do you do?

This book will tell you and hand you ways to make money.
